

e-smart 306
high performance
clear reflector
compact fluorescent
luminaries

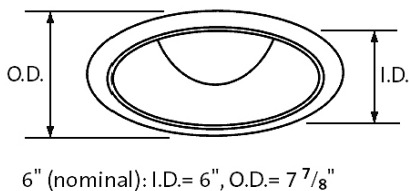

COMMERCIAL
Energy efficient
high colour rendering
electronic ballast
low maintenance
lighting

Saving up to 80% energy
from halogen, each 52W
e-smart downlight
provides lighting equal to
three 90-Watt halogen
recessed potlights over an
area of up to 80 sq. feet

6" Flat Frame-in For Vertical CF Lamp

306 Series

Electronic Ballast - Five Year Warranty

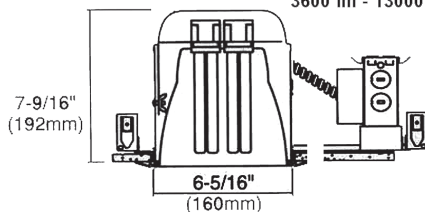

DIMENSIONS

Ceiling Cut-Out : 6-1/2"
Plaster frame : 7-5/8"W x 12"L
Lamp : Max. 52W

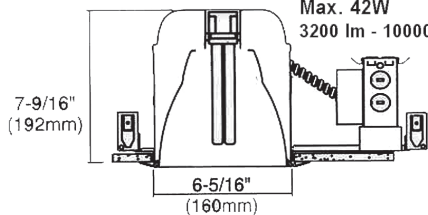

Cat. 3063

Max. 52W
3600 lm - 13000 hrs

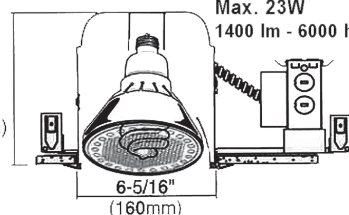

Cat. 3060

Max. 42W
3200 lm - 10000 hrs

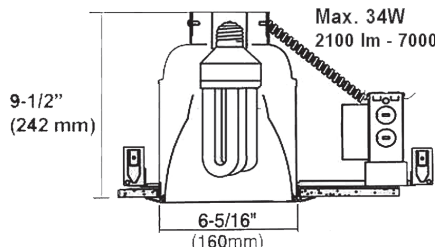

Cat. 3066

Max. 23W
1400 lm - 6000 hrs

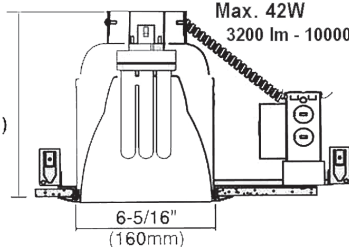

Cat. 3066

Max. 34W
2100 lm - 7000 hrs

Cat. 3066

Max. 42W
3200 lm - 10000 hrs

Clear reflector **e-smart** compact fluorescent downlights deliver the correct blend of brightness, contrast, colour rendering, glare control and visual comfort to provide the ultimate energy savings required by today's commercial spaces.

Electronic ballast guarantees flicker free lamp operation, extends lamp life and provides improved lamp lumen maintenance.

e-smart downlights deliver unparalleled system efficiency and energy reducing capabilities, plus ease of maintenance and lasting durability.

MAXIMIZED COST SAVINGS

- ① Each **e-smart** luminaire replaces up to three halogen downlights, saving 80%+ of energy and air conditioning costs.
- ② Quicker installation, easier handling and smaller volume of fixtures reduce the installation cost.
- ③ One 52 W **e-smart** downlight replaces up to 270 Watts from three 90PAR38 halogen potlights, and needs relamping only once in every two to three years.

When calculated with the required light levels and usage hours by today's energy costs, and the downsizing of air conditioning needed, **e-smart** provides an exceptional value to the end user: **It pays for itself.**
