Specular Trims

6" Flat Frame-in For Vertical MH Lamp

406 Series

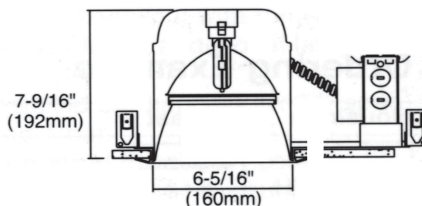

Electronic Ballast - Five Year Warranty

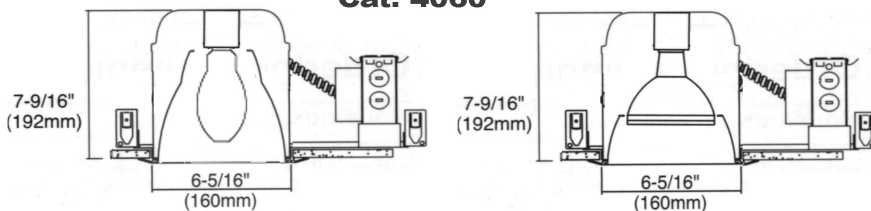

DIMENSIONS

Ceiling Cut-Out : 6-1/2"
Plaster frame : 7-5/8"W x 12"L
Lamp : Max.150W

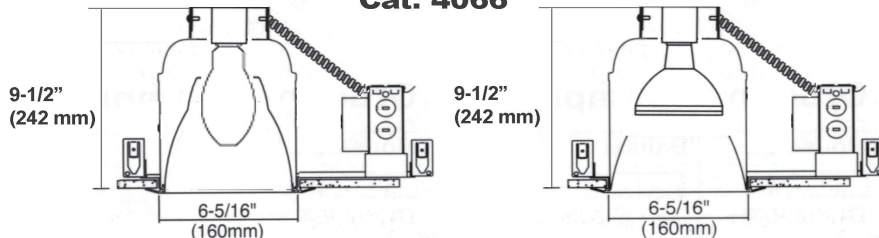

Cat. 4063

Cat. 4060

Cat. 4066

Open reflector **e-smart** metal halide downlights deliver the correct blend of brightness, contrast, colour rendering, glare control, visual comfort and center beam candlepower intensity to provide the optimised energy efficient illumination of todays commercial spaces. **Electronic ballast** extends the lamp life by up to 50% and providing improved lamp lumen maintenance, colour rendering and colour stability.

e-smart downlights deliver unparalleled system efficiency and energy reducing capabilities, plus ease of maintenance and lasting durability.

MAXIMIZED COST SAVINGS

- ① Each **e-smart** luminaire replaces up to twelve halogen downlights, saving 80%+ of energy and air conditioning costs.
- ② Quicker installation, easier handling and smaller volume of fixtures reduce the installation cost.
- ③ One 150 W **e-smart** downlight replaces up to 1080 Watts from twelve 90PAR38 halogen potlights, and needs relamping only once in every three to four years.

When calculated with the required light levels and usage hours by today's energy costs, and the downsizing of air conditioning needed, **e-smart** provides an exceptional value to the end user:

It pays for itself.
