disano

Introducing the Disano. An elegant, lightweight interior and exterior luminaire with invisible "out-of-sight" remote ballast. Versatile Disano delivers high efficiency direct-indirect lighting to retail stores, malls, lobbies, hospitals, airports, atriums, showrooms, restaurants, clubs and campuses. High performance optical systems are engineered in unbreakable, lightweight Lexan polycarbonate. Suitable for any interior, exterior, wall- and pole-mounted application, the Disano luminaire is available in 16 and 22-inch sizes with all current light sources and a variety of practical mounting accessories. Energy efficient, long life electronic or Pulse Start ballasts are standard with a five-year warranty on all electrical components.

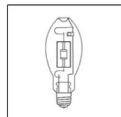

Attractive see-through Metalized Refractor maximizes downward fixture efficiency. A thin layer of 99.9% pure aluminum is vacuum-deposited on the inner surface of polycarbonate refractor.

Mounting Options

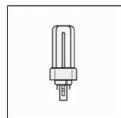

- CRx (canopy + rod x" long)
 - CAx (canopy + aircraft cable x" long)
 - CCx (canopy + curly cord x" long)
- Please specify white, black or silver cord.

Incandescent
max. 150W

Metal Halid
max. 400W

Compact Fluorescent
max. 120W

Invisible Remote Ballast
A clean architectural appeal of Disano luminaires is achieved with remote ballast. Hidden away in the ceiling or under the roof deck, the remote ballast can be painted to match its surroundings.

Strong, Lightweight Luminaire
Unlike heavy glass reflector fixtures, lightweight, unbreakable Disano polycarbonate refractor luminaire is easy to ship, easy to handle and installs with little chance for breakage.
